MESSAGE FROM THE FOUNDING **DIRECTOR'S DESK**

At Ujala Cygnus, our mission has always been to bridge the healthcare divide in India's tier-2 and tier-3 cities by providing quality, affordable and compassionate care. Over the years, we have seen how clinical excellence and patient trust go hand in hand. But true transformation in healthcare also requires nurturing the next generation of doctors, professionals and allied health professional.

The Academics and Research Department embodies this vision. By combining our deep experience in delivering care across underserved regions with structured training and research, we are creating a platform where knowledge meets practice. Our academic initiatives are not just about imparting medical skills – they are about instilling empathy, innovation and a commitment to equity in healthcare delivery. Through collaborations with leading universities, digital platforms and our own network of hospitals, we are working to create an ecosystem where learning is continuous and context-driven. The aim is simple yet profound: to ensure that every healthcare professional trained at Ujala Cygnus becomes a catalyst for change, carrying forward our belief that world-class healthcare belongs to every Indian, regardless of geography and class.

DR. SHUCHIN BAJAJ

Founder-Director, Ujala Cygnus Healthcare Services

MESSAGE FROM THE VICE PRESIDENT
ACADEMICS & RESEARCH

The Academics & Research Department at Ujala Cygnus is built on the conviction that education, inquiry and innovation are the cornerstones of healthcare excellence. In regions where access to specialised training and structured mentorship has traditionally been limited, our department provides opportunities that are both rigorous and relevant to local realities. Our focus spans three pillars: academic training, clinical research and knowledge dissemination. We design programmes that are practical, patient-centric and aligned with evolving healthcare needs – from primary care to advanced specialties. At the same time, our research initiatives address the unique disease burdens and health patterns of the communities we serve, ensuring that solutions are evidence-based and context-specific. What excites me most is the opportunity to shape not just competent healthcare professionals, but compassionate leaders who view medicine as a service to society. Together with our academic partners, we are building a knowledge ecosystem that supports continuous growth – for our doctors, nurses and allied health staff – while contributing to national health priorities and global medical discourse. This is just the beginning. As we expand our academic footprint, our vision is to make Ujala Cygnus a hub for community-driven healthcare education and applied research, setting new benchmarks in both quality and accessibility.

DR. VANDANA CHAWLA
Vice President, Academics & Research,
Ujala Cygnus Healthcare Services

ABOUT **US**

Choosing The Right Institution For Shaping Your Future Is More Than Just A Decision – It's A Commitment To Building A Better Life.

Ujala Cygnus is one of North India's fastest-growing healthcare groups, with 25+ NABH-accredited hospitals serving over 5 million patients annually across tier-2 and tier-3 cities. With its strong focus on affordable, accessible and quality healthcare, Ujala Cygnus is uniquely positioned to become a hub for training and employing allied healthcare professionals, who form the backbone of modern healthcare delivery.

Ujala Cygnus is positioned as an inclusive, value-based healthcare brand dedicated to delivering quality care in underserved areas, with a strong emphasis on affordability. Our academic programmes not only nurture knowledge and skills but also immerse allied health professionals in real-world experiences – ranging from cost-conscious care and large patient volumes to public health programmes and government schemes.

Because Ujala Cygnus spans multi and super specialities, students and professionals gain exposure to advanced cases and multidisciplinary teams, equipping them to meet the healthcare challenges of tomorrow.

With a strong focus on empowering students to succeed in their careers, we provide an environment that fosters innovation, continuous learning and personal development. Rooted in our culture of serving remote, rural and tier-2/3 towns, the experience at Ujala Cygnus offers a perspective and depth of learning that goes far beyond what traditional city hospitals can provide.

STRENGTHS OF UJALA CYGNUS FOR **ALLIED HEALTHCARE PROFESSIONALS**

- A large and expanding network of 25 NABH-accredited multi-super-speciality hospitals across North India.
- Rapid growth through acquisitions and affiliations, creating increased demand for allied health staff.
- Expansion into tier-2 and tier-3 towns, offering more opportunities in regions that previously had limited options.
- Focus on Centres of Excellence in critical disciplines such as neurology, cardiology, oncology and others, providing allied health professionals with exposure to advanced settings.
- Hospitals equipped with modern diagnostics, laboratories, OTs and critical care facilities, giving allied health professionals access to the tools and environments needed to develop their technical expertise.

IMPORTANCE OF ALLIED HEALTH COURSES

Allied Health courses play a vital role in strengthening the healthcare system by preparing skilled professionals who support diagnosis, treatment, and rehabilitation. These programmes train experts in areas such as medical laboratory technology, radiology, physiotherapy, nutrition, and emergency care, forming the backbone of clinical services.

Allied Health professionals bridge the gap between doctors, nurses, and patients, ensuring quality care, accurate diagnostics, and effective recovery. With the growing demand for healthcare services, especially in preventive and community health, Allied Health careers offer vast opportunities for meaningful work, innovation, and lifelong learning. In essence, Allied Health courses are essential for building a competent healthcare workforce that enhances patient outcomes and supports a healthier society.

ESSENTIAL COURSE INFORMATION

Eligibility

- 10+2 pass candidates with ≥ 50% marks.
- All allied health vocational courses require 10+2 qualification in any stream, preferably PCMB/BiPC.
- The student must have attained the age of 17 years.

Course Level

CERTIFICATE
(6 months)

DIPLOMA
(1 year)

ADVANCED DIPLOMA
(2 years)

UNDERGRADUATE
(3 years)

MASTER'S
(2 years)

Affiliation

All courses are affiliated with a reputed UGC-accredited university.

Note

If the student is a 10th-pass, two additional years are added to each course duration.

COURSES OFFERED

Operation theatre Technology

Operation Theatre & Anaesthesia Technology equips you with specialised skills to assist in surgeries, manage anaesthesia and ensure patient safety – opening rewarding careers in hospitals and surgical care.

JOB ROLES & CAREER OPTIONS

Hospitals & Surgical Centres

- Operation Theatre Technician / Technologist
- Surgical Assistant
- OT Assistant / OT In-charge
- Equipment Maintenance Officer
- CSSD (Central Sterile Supply Department) Technician
- Emergency / Trauma Technician
- Transplant or Cardiac OT Specialist
- Anaesthesia Technician / Technologist
- Clinical Anaesthesia Assistant
- Operation Theatre (OT) Technologist
- Critical Care / ICU Technologist
- Emergency Care Assistant
- Pain Management Assistant
- Anaesthesia Equipment Specialist
- Research Assistant (Anaesthesia Department)
- Educator / Trainer (in paramedical institutions)

Higher Education & Career Growth Paths

- Diploma in Operation Theatre Technology
- B.Sc in Operation Theatre and Anaesthesia Technology
- M.Sc in OT Technology / Anaesthesia Technology
- Certificate Courses

Radiology and Imaging Technology

This specialisation trains students to use X-rays, CT scans, MRIs, and other imaging techniques to help diagnose and monitor diseases. It opens strong career opportunities in hospitals, diagnostic centres, and advanced imaging facilities, where the skills play a key role in accurate treatment planning.

JOB ROLES & CAREER OPTIONS

- Radiology Technician / Imaging Technologist
- CT / MRI Technician
- Ultrasound / Sonography Technician
- Radiology Supervisor / Senior Technologist
- Radiology / Imaging Coordinator
- Quality Assurance / Safety Officer
- Research / Academic Career

Higher Education & Career Growth Path:

- B.Sc. in Radiology & Imaging Technology / Medical Imaging Technology / Radiography
- M.Sc. in Medical Imaging Technology / Radiology / Nuclear Medicine Technology
- Advanced Certifications

Optometry

Get trained to examine, diagnose, and manage eye and vision problems. It offers a stable and respected career in eye hospitals, clinics, and optical centres, with growing demand in India and abroad.

JOB ROLES & CAREER OPTIONS

- Optometrist / Eye Care Specialist
- Clinical Optometrist / Paediatric Optometrist
- Low Vision Therapist / Vision Rehabilitation Specialist
- Contact Lens Specialist
- Research & Academic Optometrist
- Ophthalmic Technician / Assistant
- Optical Store Manager / Consultant

Higher Education & Career Growth Paths

- B.Sc. in Optometry
- M.Sc. in Clinical Optometry
- Ph.D. in Vision Science / Optometry
- Fellowships / Diploma in Optometry Specialisations

Physiotherapy & Sport Injuries

This specialisation trains you to help patients recover from injuries, surgeries or physical limitations, with a focus on sports rehabilitation. It offers a fulfilling career in clinics, hospitals and fitness centres, directly improving mobility and performance.

JOB ROLES & CAREER OPTIONS

Clinical & Hospital

- Physiotherapist / Clinical Physiotherapist
- Rehabilitation Specialist
- Orthopaedic / Neuro / Cardio-Respiratory Physiotherapist
- Post-Operative Care Expert

Sports & Fitness Sector

- Sports Physiotherapist
- Athletic Trainer
- Exercise and Fitness Consultant

Community & Home Health Care

- Community Rehabilitation Worker
- Home Care Physiotherapist

Education & Research

- Lecturer / Assistant Professor
- Research Scientist / Clinical Research Associate

Corporate & Industrial Health

- Corporate Physiotherapist
- Ergonomics Specialist

Higher Education & Career Growth Paths

- BPT (Bachelor of Physiotherapy)
- MPT (Master of Physiotherapy)
- PhD in Physiotherapy
- Postgraduate Diploma / Certification Courses

8 Patient Care Management (PCM)

This specialisation prepares you to manage and coordinate patient services, ensuring comfort, safety and quality care. It opens career paths in hospitals, elder care facilities and healthcare management roles.

JOB ROLES & CAREER OPTIONS

Hospitals & Healthcare Facilities

- Patient Care Coordinator / Manager
- Patient Relations Executive
- Hospital Operations Executive
- Clinical Care Coordinator
- Patient Safety Officer
- Admission and Discharge Manager
- Quality and Accreditation Executive

Home & Community Health Care

- Home Care Manager / Coordinator
- Case Manager (Chronic / Elderly Care)
- Palliative Care Coordinator
- Telehealth / Virtual Care Manager

Health Insurance & Corporate Sector

- Medical Claims Executive
- Health Benefits Coordinator
- Medical Case Reviewer

Administration & Quality Management

- Hospital Quality Coordinator (NABH, ISO Standards)
- Operations Manager / Unit Manager
- Healthcare Administrator

Education & NGO Sector

- Programme Coordinator (Public Health / Patient Welfare Projects)
- Trainer / Educator

Higher Education & Career Growth Paths

- Certificate / Diploma in Patient Care Management
- B.Sc in Patient Care Management / Hospital Management / Health Administration
- MBA / MHA (Master of Hospital Administration)
- Postgraduate Diploma in Healthcare Management / Patient Relations

Nutrition and Health Care Science

This specialisation trains you in diet planning, clinical nutrition and health promotion. It offers careers in hospitals, wellness centres and public health programmes, where nutrition experts play a vital role in disease prevention and recovery.

JOB ROLES & CAREER OPTIONS

Clinical & Hospital

- Clinical Dietitian / Nutritionist
- Therapeutic Nutritionist
- Renal / Oncology / Cardiac Dietitian
- Critical Care Nutrition Expert
- Public Health & Community Nutrition

Public Health Nutritionist

- Community Health Educator
- Programme Coordinator (ICDS, WHO, UNICEF Projects)
- NGO / Government Nutrition Officer

Sports & Fitness Sector

- Sports Nutritionist / Performance Dietitian
- Gym / Fitness Centre Consultant
- Personal Nutrition Coach

Food Industry & Research

- Food Product Developer
- Food Quality and Safety Analyst
- Nutrition Research Scientist
- R&D Officer in Food Companies
